Course Content: Court reporters record verbatim (word-for-word) testimony and produce transcripts of the testimony. Instruction includes an introduction to verbatim writing skills to work with persons with hearing loss (CART – Communication Access Realtime Translation) and provide captioning for television. The program at ATC utilizes the latest technology in computer-aided transcription and real-time writing; i.e., the ability to have an instantaneous translation of the spoken word by projecting the words onto a television screen for the benefit of persons with hearing loss or onto computer monitors for the benefit of trial participants.

This program is a planned sequence of instruction consisting of three (3) levels. Students completing Court Reporting Technology and Court Reporting 2 possess the entry-level skill-set of a scopist or transcriptionist. To become a Court Reporter, students must complete all three (3) levels of the program. This program places strong emphasis on conflict-free theory, real-time writing, speed development, legal terminology, medical terminology, courtroom procedures, and English skills. When a student reaches the speed of 200 words a minute, he/she participates in an internship that enables the student to sit in on trials and depositions with a working reporter, thus gaining confidence and skill.

A court reporting career, including broadcast captioners, offers an independent lifestyle, prestige, and flexibility, along with a substantial salary.

Students shall pass three (3), five-minute tests with 95% accuracy at each of the following speeds: 225 wpm testimony (two-voice), 200 wpm jury charge, and 180 wpm literary. Students shall complete at least 40 verified hours of actual writing time during the internship experience.
