PROGRAM

Pharmacy Technician ATD

GRADUATION DATE

2025

WHY DID YOU CHOOSE ATC?

I chose ATC for high school because of the technical programs. During covid-19, ATC, among other high schools, presented on my middle school's virtual college fair.

HOW IS ATC DIFFERENT FROM OTHER SCHOOLS?

The curriculum is fast-paced and ATC prepares you more for the workforce than for post-secondary education.

HOW DID ATC PREPARE YOU FOR YOUR CAREER?

It reassured my passion in Pharmacy as a career and was a great start towards my PharmD due to both the certifications and knowledge!

MY STORY...

Growing up was tough, especially until around my 17th birthday, the same week I started my Pharmacy ATD course at ATC. At that time, I felt no sense of belonging—all this to say that it was my enrollment at ATC that gave my life so much purpose and direction in an era of being lost. I even got a job at CVS shortly after earning my certification, thanks to my extraordinary professor, Mrs. Washington. I have ATC's Pharmacy ATD technical program to thank for my lifestyle, as I am now pursuing my doctorate in Pharmacy at Florida Agricultural and Mechanical University!

WHAT SHOULD FUTURE STUDENTS KNOW ABOUT ATC?

Prepare yourself mentally to strive.

DID YOU CONTINUE YOUR EDUCATION AFTER ATC?

Yes, at Florida A&M because of their 6-year PharmD track!
