COURSE CONTENT

Students will learn how to set up and operate the following types of machines: contour saw, drill press, lathe, milling machine, grinder, and Computerized Numerical Control (CNC) machines. Instruction also includes the use of precision measuring instruments such as, layout and inspection tools, micrometers, and gauges. CNC programming, use of Computer Aided Design/Computer-Aided Manufacturing (CAD/CAM) processes, and set up and performance of advanced level machining operations are taught.

Related trade math and blueprint reading are part of the program and are used extensively in laboratory activities. The machinery and materials used are those commonly found in the machine tool industry. Instruction is provided in safe practices, which are critical in this industry, and the use of tools, equipment, materials, and processes found in the machining industry.
